STORAGE AND MAINTENANCE

It is recommended that new Chemsol HG garments are stored in their original packaging and clear of UV sources.

Once used it is recommended that the care instructions, as detailed on the label, are followed. To remove contamination, Chemsol HG clothing should be rinsed down with cold water, and subsequently allowed to drip dry in the shade, clear of UV sources. Chemsol HG clothing should be stored in a cool, dry and clean environment.

Advice: For reasons of hygiene the garments should preferably be worn by the same person.
