

Eye Pad Dressings

SKU: REL-321

[\(View Product Online\)](#)

Description:

Thick, comfortable sterile eye pad dressings, attached to continuous stretch bandage. The dressing pad has a low adherent contact layer, designed not to stick. Suitable for replacement in all HSE first aid kits. All versions are individually wrapped and sterile.

- Low adherent sterile eye pad
- Choice of boxed or flow wrap
- Blue option for food areas

Frequently Asked Questions:

Q: Is the eye pad dressing individually sterile wrapped?

A: Each eye pad dressing is individually flow wrapped to keep optimal sterility until use, which complies with the best practice hygiene standards.

Q: Does it include a bandage to secure the pad?

A: This eye pad comes with a stretchy conforming bandage attached, which allows for secure and comfortable fixation around the eye socket without needing bandage tape or additional fixation.

Q: Can this eye pad dressing be used for post operative eye care?

A: The non-adherent sterile pad and breathable, secure attached bandage make this eye pad dressing suitable for post-operative protection or external eye injuries, so long as professional medical advice has been given before use.

Q: Does this product meet UK workplace first aid guidance?

A: The inclusion of sterile eye pads is recommended under workplace first aid guidance for employer first aid kits.
