## Frequently Asked Questions:

### Q: What regulations determine when eyewash pods are needed?

A: Under the Health & Safety Executive (HSE) guidance, workplaces must supply “adequate and appropriate” first aid following a first aid needs assessment for that workplace. When there is risk of eye injury (dust, debris, chemicals) in a workplace, sterile eyewash should be provided.

**Q: Are these 20 ml eyewash pods acceptable under UK first-aid guidance?**

A: Each eyewash pod contains 0.9% sterile saline solution, which is a standard, safe irrigation solution for eye rinsing and foreign-body removal.

**Q: What types of eye injuries are these pods suitable for?**

A: These eyewash pods are suitable for flushing out dust, grit, debris, or minor irritants.

**Q: How many eyewash pods come in a pack?**

A: There are 25 eyewash pods per box.

**Q: Are these pods compatible with eyewash stations?**

A: These eyewash pods are compatible with standard eyewash stations, making them a simple refill option for mounted eyewash facilities.
